## About This Game

### About ARK Park

ARK Park is a virtual reality multiplayer adventure game designed from the ground up to immerse players in a realistic dinosaur theme park. This interactive experience will fulfill your dreams of entering a world where living, breathing dinosaurs still roam the Earth. Freely explore this grand, virtual world where there's no set plot line or schedule. Join your friends in multiplayer park tours to share the thrill of witnessing over a hundred prehistoric creatures up-close and personal.

### Game Features:

- Explore the Expansive Scenery of ARK Park: Visit over 10 unique scenes alone or with a group of friends.
- Collect Dinosaur DNA, Gather Materials, and Craft Items: Collect DNA and materials from the dinosaurs you encounter on your excursions, trade them for Engrams at your base camp, then use those Engrams to craft helpful items.
- Raise Your Very Own Dinosaurs: During your excursions throughout the park, you may be lucky enough to collect a rare dino egg. Take good care of it until it hatches, and you'll be able to raise your own dinosaurs from hatchlings to adulthood. Some dinos may even grow to be large enough to ride!
- Defend Vital Technology: Dinosaurs aren't the most docile creatures - band together with other ARK Park visitors to defend important research outposts and valuable technology from rampaging dinos!

Finally the game is on sale, and there is an update. The game has very good quality and strong immersion. Currently I just played the tutorial, I will continue to play it tomorrow. I like dinosaurs very much.. feels like this should be an offshoot of the main ark game, this game feels like a point and click demo and quite the let down, feels like a 5\$ game with the tek package, if not free otherwise. Absolutely terrible game!

The tutorial is bigger than the game itself. I thought this was an open world island exploration game, but it isn't.

The playable world is as small as your livingroom, and that's it.. Definitely not worth the money spend, pretty boring all together...some say grapics is great, but I don't really agree, dinos look kinda plastic, gameplay is close to non-existent. I wouldn't recommend.. BUYERS BEWARE!!!!

Running a 1080ti SC2 Hybrid, Ryzen 7 1800x, on a Samsung HMD Odyssey and the developers didnt properly sync displays for each eye, giving me this double vision effect which seriously can't be good for you. Also, some things render in one display and not the other. This game is far from done... Definitely not the piece of art i've seen in the Trailers. Super dissapointed as I am a huge fan of Ark: Survival and really didn't have the highest expectations for this game to begin with! SMH :(

---

This is a joke, shame on you! Game crashes when I'm not even past the teleport tutorial. Can't press buttons after, started singleplayer and got very annoyed when that lady kept saying: "Spread your arms and press both triggers." when I'm doing exactly what she's telling me to do and crashed when I click my PC screen. Conclusion, after a long year of waiting, keep those 40 dollars/euros and buy 40 scoopes of ice cream instead of buying this "game".. running 1080 64 gig 12 thread cpu wmr and its terrible. so blurry I can't even play it!!!!

my other games run fine. no ajustment i make helps.. Ark is one of my favorite game, and i have been looking forward to this since it was announced.

The game does have good aspects but it also have some really negative ones too

#### Pros

You get to be in a VR world with dinosaurs

You get to hatch and grow said dinosaurs

It is a fun first time experience

#### Cons

Really short game, i have done almost everything you can do in this game and after that it just isnt that fun anymore.

There is no one in multiplayer

The trailers make the game look alot cooler than it actually is

It is not worth \$40, Wait for a sale

Do not buy the tek edition, i dont even have it but i can already tell it is not worth it

If the game is updated with new things in the future and more replayability is added i will consider playing this game more.. this game is a joke...its not a game its not a demo ....its♥♥♥♥♥no more...dont buy this, i hope i get my refund, graphics are simple not even more...gameplay dosent exist! you can do nothing thats not a game...you walk in different levels and each level give ♥♥♥♥ ...there is nothing realy to do...you cant going outside the path...the areas are so tiny explore one boring fake area in only 1 minute, thats not a joke...one minute to explore each level...i dont know what the game is ? its just crap pls dont waste your time and money, its not a game truely! why the developers of the world make no real vr games? Im so confused because vr is ♥♥♥♥ing crazy its a revolution its fun its great ...but this game is sooo stupid its funny...the only real game in vr you can play is elite dangerous,and alien isolation ...but alien isolation its not real vr just a mod that you can use your vr device...but worlds better than this boring fake game! 40 bugs for this demo is like a ♥♥♥♥ in your♥♥♥♥♥its a pain .give us real games for real money ! serious? ♥♥♥♥ you ark survival is a great game and you shame it...dont call this ark ...call it what it is ...as a game it is crap...as a demo its cool...but 40 bugs..you scammers...just watch gameplays on yt one hour the game ist done...i was hyped by myself this was a huge mistake...like no mans sky !but we can dream, some day there is a real cool vr dinosaur game! but my last word : there is one hope for stuff like this\_ alt+f4. Seeing the promotional video made me shocked. Can vr make such an effect? I doubt it. After a long wait

Finally experienced the game. As far as the game is concerned, it feels less content. But, oh, this is vr.

Can you understand the feeling of vr? When you feed the dragon, even if you know it is a model, but when it comes to you

When interacting, that sense of experience is no other game can do.

. Great Game and I can't wait for more DLC. I am new for games, just buy it for my son. He likes a lot.. I waited so long for this game, Love dinosaurs and couldn't wait to have a real game with them in VR. This is not a game, not even a okay tech demo, this is litterly crap that I bought. FIrst thing I noticed is the horrific graphics quality, some here say it looked great and the game is awesome. I can tell you they are either working for the company that made this or are 3 yrs old and don't know any better. It is so blurry the game, and so incredibly bad looking, like a game from the late 90's. The game play is a joke, cause there is none, you can explore, yeah right.....you can explore a 20ft radius with nothing to do, you litterally put fake gloves on that don't sync to where your actual hands are and then shake a bush here and there for 20sec at a time to collect fruit for no good reason. Thought I was going to be able to walk around in this open world, NOPE, you teleport which is horrible and there is no place to go cause you can only teleport 20ft in only certain directions. The animations are all pre defined and horrible, you litterally stand there while a really fake looking dinosuar walks right through you like your not there. I thought I can drive a jeep, NOPE, you ride in one while a robot drives and you look around at the worse dino animations and horrific quality forest. I feel like I was scammed, they tried to make this feel like an amazing open world with AI dinosuars, game play, awesome graphics, and instead gave us a half♥♥♥♥♥demo. The idea that people liked this and don't work for the company is hilarious.

The good:

You can refund your money

---

The Bad:

Bad Graphics

Teleporting

Horrible pre-defined animations

No game play besides collecting fruit and wood....yes you heard that right

Price is a joke!. There is no reason to like it, like between valleys, like the sea, like dinosaurs. I just like it.. Good enough for young kids that don't know any better, but this game is most certainly not worth \$40.
